

Software Requirement Specification (SRS)

Client Project Tracker System

1. Introduction

Purpose: The Client Project Tracker System is designed to streamline project management by providing a centralized platform to manage clients, projects, tasks, deadlines, and communication.

Scope: Web-based application built using Django framework supporting client management, project monitoring, task tracking, dashboards, and notifications.

Objectives

- Reduce manual project tracking
- Improve team productivity
- Provide real-time project updates
- Enhance communication between clients and teams

2. Overall Description

System Perspective: Hosted on a web server and accessed via browsers. Uses SQLite/MySQL and responsive UI.

Main Modules

- Authentication Module
- Client Management
- Project Management
- Task Tracking
- Dashboard & Analytics
- Notification System

3. Functional Requirements

User Authentication

- Login/logout functionality
- Role-based access control

Client Management

- Add, edit, delete clients
- Maintain contact details and history

Project Management

- Create projects with deadlines
- Assign teams
- Manage files

Task Management

- Assign tasks
- Track progress
- Update status

Dashboard

- Charts
- Reports
- KPIs

Notifications

- Deadline reminders
- Project alerts

4. Non-Functional Requirements

- Performance: Fast response time
- Security: Encrypted data and role-based access
- Usability: Responsive UI
- Reliability: High uptime

5. System Requirements

Hardware

- Minimum: 4GB RAM, Intel i3
- Recommended: 8GB RAM, Intel i5

Software

- Python 3.x
- Django
- SQLite/MySQL
- Bootstrap
- VS Code

6. Database Design

- User Table
- Client Table
- Project Table
- Task Table

7. Advantages

- Improves productivity
- Easy monitoring
- Reduces errors
- Real-time tracking

8. Future Enhancements

- AI Task Prediction
- Mobile Application
- Cloud Deployment
- Real-time Chat System

9. Conclusion

The system provides a structured, efficient, and scalable solution for project management using Django and Python.
